## II About the strategy

Date published	2005 May
Signed by a minister	No
Duration	NK
Number of pages	36

**The approach: How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and embrace its weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)?**

The approach is to set guidelines for researchers desiring access to Southland Conservancy, and to provide a tool for managers to decide the appropriate research needed from this focus area by the Department of Conservation.

Read more about the GDS's vision on page 6.  
Is the strategy illustrated? No.

## III Assessing stakeholder usefulness

**If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?**

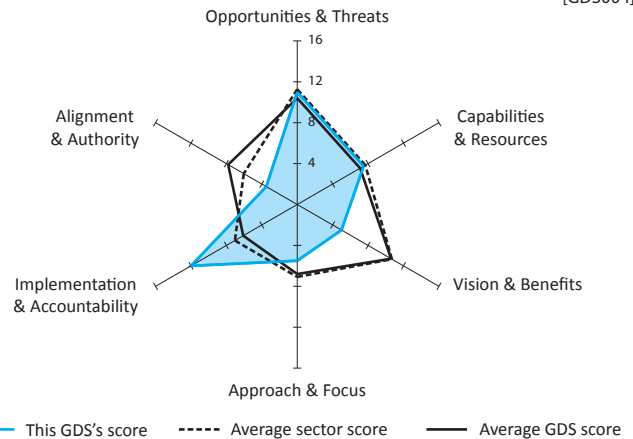

The key points of the issue are very clear, but the way in which the outcomes sought will be reached is not informative enough and only a few examples are provided. The GDS explains who reviewed the GDS, which is useful information.

**If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the approach (element 4), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?**

The overall purpose and the review processes of the strategy are clear. The strategic outcomes are not clear. The focus is heavily on researchers, which may make it difficult for the public to follow, and the structure could be improved to make it more readable.
