II About the strategy

Date published	2014 February
Signed by a minister	No
Duration	240 months
Number of pages	42

The approach: How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and embrace its weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)?

The approach taken is to support the development of technology and infrastructure that will improve the cadastral system's practical value for all New Zealanders.

Read more about the GDS's vision on page 25. Is the strategy illustrated? No.

III Assessing stakeholder usefulness

If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?

The key points are well-articulated and there is good explanation of why the strategy is necessary and where it is situated in LINZ's wider strategic position. There is a thorough discussion of the various agencies that are connected to the strategy. The GDS comprehensively identifies where it is lacking in capabilities. The GDS has an extremely logical structure, and is visually appealing.

If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the approach (element 4), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?

The overall purpose is very clear and the GDS sets out its context, which is very valuable. The objectives/outcomes sought are very easy to understand and they are broken down into clearly identifiable 'goals'. However, its review processes are not sufficiently discussed, which lets the strategy down.
