## II About the strategy

Date published	2009 September
Signed by a minister	Yes
Duration	252 months
Number of pages	13

**The approach: How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and embrace its weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)?**

The approach taken is to ensure MPI oversees the new institutional arrangements within the fisheries sector, which will balance 'use' and 'environment' outcomes to maximise the benefits of fisheries.

Read more about the GDS's vision on page 5.  
Is the strategy illustrated? Yes, see page 7.

## III Assessing stakeholder usefulness

**If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?**

The key points of the issue are not given in detail, but the outcomes sought are outlined clearly. There is a lack of information as to how these outcomes will be achieved, particularly due to limited information on funding and time frames.

**If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the approach (element 4), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?**

The overall purpose is understandable; the 'definition of terms' section would be particularly useful for the public. However, there is not enough specific detail in the 'strategic purposes' section to understand exactly what this GDS will achieve, when this will happen and how the review processes will work.
