**The approach: How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and embrace its weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)?**

The approach is to devise a set of pest management principles which will drive consistency and collaboration in pest management, enabling all decision-makers and stakeholders (such as DOC, MAF, regional councils and industry) to make decisions in line with MPI policy.

Read more about the GDS's vision on page 8.  
Is the strategy illustrated? Yes, see page 8.

## III Assessing stakeholder usefulness

**If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?**

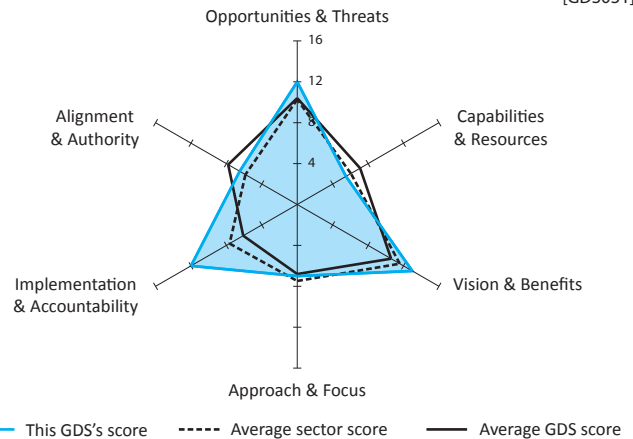

The key points of the issue and the outcomes sought are well explained. A public servant would gain a solid understanding of the relationships between relevant agencies making decisions on pest management. However, there could be more information on finding mechanisms and resources.

**If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the approach (element 4), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?**

The overall purpose is clear, but the strategic outcomes could be made more specific so that their outputs are more readily understood. Information on the review processes is adequate but could benefit from information on who will carry it out.
