## II About the strategy

Date published	2011 May
Signed by a minister	Not signed
Duration	48 months
Number of pages	4

**The approach: How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and embrace its weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)?**

The approach is to coordinate a response across government to enable the primary sector to make the most of the aquaculture industry by ensuring the relevant departments (such as DOC, MPI, TPK and MFS) complete actions to improve investment and regulations in this area before 2016.

Read more about the GDS's vision on page 1.  
Is the strategy illustrated? Yes, see page 3.

## III Assessing stakeholder usefulness

**If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?**

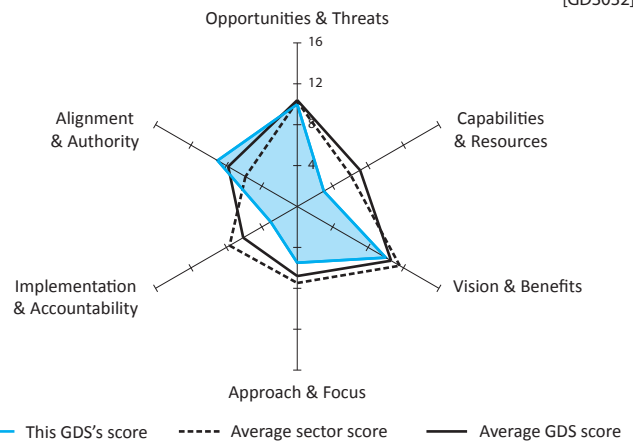

The key points of the issue are outlined comprehensively, as well as how this GDS aligns with other MPI strategies. However, understanding how the outcomes sought will be achieved is restricted due to the lack of discussion regarding funding.

**If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the approach (element 4), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?**

The overall purpose is understandable (particularly given its short length), and the table at the back (page 4) is highly informative as to the tangible outputs of the strategy. However, there is no discussion regarding the review processes.
