## II About the strategy

Date published	2005 March
Signed by a minister	Not signed
Duration	NK
Number of pages	25

**The approach: How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and embrace its weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)?**

The approach is to establish a strategic direction for funding of Vote Research, Science and Technology, so that Māori resources and knowledge can be better utilised in New Zealand planning.

Read more about the GDS's vision on page 2.  
Is the strategy illustrated? No.

## III Assessing stakeholder usefulness

**If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?**

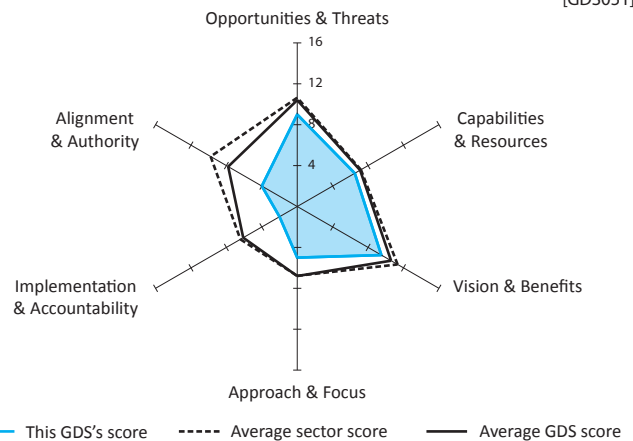

The key points of the issue are explained well, including its drafting and consultation process and context. However, it needs to be clearer on the outcomes sought and more specific information on how they will be achieved; in particular, funding information should be provided. The GDS is integrated well with ministerial priorities.

**If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the approach (element 4), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?**

The overall purpose is well articulated, but the strategy's structure could be clearer. The GDS includes informative diagrams illustrating the relationship between agencies carrying out the strategy. There is no discussion of review processes.
