## II About the strategy

Date published	2013 November
Signed by a minister	No
Duration	72 months
Number of pages	32

**The approach: How does the department plan to use the broader environment in which it exists (element 1) to leverage its strengths and embrace its weaknesses (element 2) so that it can provide benefits in accordance with its vision (element 3)?**

The approach is to continue implementation of the National Health IT Plan and identify work programs to prioritise which will provide all New Zealanders with access to their personal health information by 2014.

Read more about the GDS's vision on page 1.  
Is the strategy illustrated? Yes, see page 4.

## III Assessing stakeholder usefulness

**If a public servant new to the policy area had an hour to read this GDS, would they be able to understand the approach (element 4) and the implementation and review processes (element 5)?**

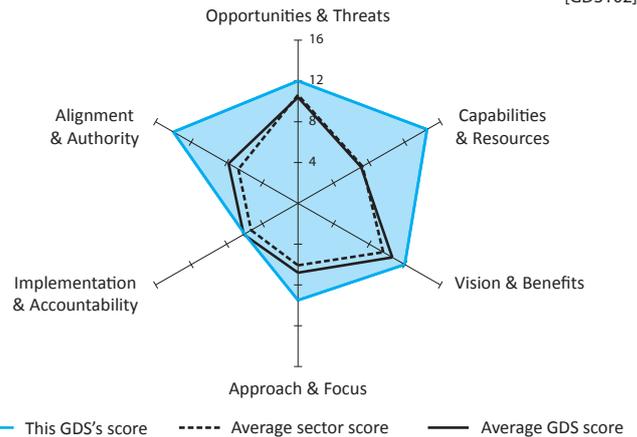

The key points of the GDS are informative; however, the structure of the GDS is difficult to navigate. The prioritisation of goals in the GDS and the diagram of work programme interaction are effective. The strategic outcomes and how they will be achieved are very clear, although there could be more funding information attached to them.

**If an uninformed member of the public had 30 minutes to read this GDS, would they be able to understand the purpose (element 3), the approach (element 4), the implementation and review processes (element 5) and how this approach fits with the broader goals of government (element 6)?**

The overall purpose and strategic outcomes are understandable. The GDS provides a comprehensive background to the issues discussed and describes progress being made in this area. The review process discussion is sufficient.
