The Government’s Aquaculture Strategy and Five-year Action Plan to Support Aquaculture

MINISTER’S FOREWORD
Sustainable aquaculture growth is good for New Zealand

Our primary industries are the engine room of our economy. We need to enable primary industry growth underpinned by strong environmental performance. The Ministry for Primary Industries (MPI) vision for our primary sectors is “Growing and Protecting New Zealand”.

Within an international market characterised by strong demand for safe and sustainable seafood products, the aquaculture sector has significant growth opportunities. This growth has to be industry-led and the industry’s opportunities and aspirations are reflected in their own goal of growing annual sales to NZ$1 billion in value by 2025. The aquaculture industry has established a strategy to deliver that growth. The Government is committed to environmentally sustainable, primary sector-led strengthening of the economy and is committed to enabling the aquaculture industry to reach its goal.

The foundations for growth are already in place. Our aquaculture production is free of many of the issues facing international producers and our environmental and food safety credentials are second to none. New Zealand has good trading conditions and trade agreements with key emerging Asian markets. Within these markets, we can leverage our clean green reputation; world-leading food safety credentials are second to none. New Zealand has international producers and our environmental and food safety standards; and biosecurity management to secure premiums are acknowledged worldwide.

While the foundations for growth are strong, the sector faces particular challenges and has unique characteristics that distinguish it from other primary producers and necessitate a specific Government strategy and action plan. The bulk of aquaculture production comes from the use of public water space, which can only occur in a planning and allocation framework that balances and respects other uses of that space. For this reason, the steps necessary to establish aquaculture operations differ from many other primary producers.

Aquaculture is relatively young in New Zealand and has seen significant regulatory change in recent years.

The success of the most recent reforms will need central Government support, particularly for local authorities which are looking for Government to assist with their critical role in managing sector growth. The true value of the recent regulatory reforms will only be realised through a co-ordinated plan of action across Government.

This strategy and action plan establishes a whole-of-government pathway to enable the aquaculture sector to grow, be it through the development of new farming space, better use of existing space or getting better value from existing production. Government will:

» implement the new aquaculture law and work with councils and the public to plan for sensible and sustainable future aquaculture growth in accordance with the Resource Management Act and the New Zealand Coastal Policy Statement 2010;

» ensure the laws and frameworks governing the establishment and operation of marine and land-based aquaculture are effective and responsive, and enable industry investment;

» deliver on the Crown’s aquaculture settlement obligations to Māori and identify opportunities for improving Māori wellbeing through aquaculture development;

» build our knowledge of environmental effects and ensure a healthy aquatic environment;

» maintain and build our world-leading animal health and welfare, food safety, and biosecurity standards;

» encourage investment and adoption of innovation; and

» facilitate continued discussion between industry, government, Māori and the public as to how aquaculture should grow and be managed in New Zealand.

As the Minister responsible for aquaculture, I am excited about the pathway forward and to working with those with an interest in aquaculture to sustainably grow the sector towards its $1 billion goal and beyond.

Hon David Carter
Minister for Primary Industries

SETTING THE SCENE FOR GROWTH

Aquaculture has potential to grow as an export industry for New Zealand. As the global supply of seafood from wild fisheries is limited, aquaculture has the opportunity to meet this growing world demand through increased production. Aquaculture is the world’s fastest developing source of animal protein, growing by more than 60 percent over the past decade. The United Nations Food and Agriculture Organization reports that by 2025 over half of all seafood consumed globally will be farm produced. People around the world want to eat more seafood and New Zealand can supply a safe and sustainable product.

Whilst New Zealand cannot compete with low-end producers, we do have some distinct advantages to increase market share into higher-value/premium markets:

» Our aquaculture industry has a reputation for high environmental performance and a legislative framework that ensures this is maintained.

» We have world-leading food safety, animal health and animal welfare standards.

» International markets want to do business with us because their people demand safe food.

» Our relative geographic isolation and biosecurity measures mean we are free from diseases and pests commonly affecting aquaculture production elsewhere in the world.

» We have good water quality needed to grow a healthy and safe product.

» We have good trading conditions and proximity to key emerging Asian markets.

Supporting the Growth Pathway

This strategy and action plan sets out the government’s intended actions and activities to support growth of the aquaculture industry over the next five years. This document includes:

» the context for government’s involvement in supporting aquaculture and commitment to enabling the industry achieve its $1 billion goal by 2025;

» how this strategy relates to other documents; including the aquaculture industry’s own strategy;

» a set of values and behaviours that guide how the government acts;

» the functions and roles where government can and should act;

» the different roles played by various government agencies;

» key government actions and activities to support sustainable growth; and

» markers for measuring progress and performance.
GOVERNMENT’S COMMITMENT
Government supports well-planned and sustainable aquaculture growth in New Zealand and is committed to enabling industry to achieve its goal of $1 billion in annual sales by 2025.

TOWARDS $1 BILLION
Enabling the growth of a sustainable aquaculture industry

An essential part of this commitment is to ensure aquaculture growth takes place within acceptable environmental limits and respects other uses and values of our waterways and marine environment.

INDUSTRY’S ROLE
Sector growth must be industry-led and this strategy links and sits beneath the aquaculture industry’s own growth strategy. Government can help enable growth, but industry must identify opportunities, lead development, and invest. The Government’s strategy sets a foundation for aquaculture growth and expects Government’s role will reduce as industry capacity grows.

GOVERNMENT’S ROLE
Government must act in the public interest and ensure an appropriate balance of economic, social, cultural and ecological values. Government must uphold the Crown’s obligations under the Treaty of Waitangi. Government should only intervene where we add value and where industry and others cannot act alone. For aquaculture, the Government sees seven strategic areas where we can help enable growth, described in the objectives below:

- A Healthy Aquatic Environment
- Quality Planning & Permitting
- Effective & Responsive Regulation
- Support Māori Objectives
- Increase Market Revenues
- Increase Value through R&D
- Sound Governance

These objectives will be realised through the implementation of the Government’s Aquaculture Strategy and Action Plan. The Plan will set out the key actions required to achieve the objectives.

FIT WITH OTHER STRATEGIES AND INITIATIVES
This Aquaculture Strategy and Action Plan has been developed to complement and support the Government’s overarching environmental and economic initiatives. This strategy aligns with both the aquaculture industry’s Strategy and the Ministry for Primary Industries’ 2030 Strategy, setting out how the government can support the growth pathway established by the sector.

A CO-ORDINATED RESPONSE ACROSS GOVERNMENT

Core Values
- Industry-led growth: Policy, regulatory and business environment settings are in place to enable the private sector to lead and grasp opportunities for economic growth.
- Sustainable: Aquaculture growth in New Zealand must be environmentally sustainable.
- Well planned: Aquaculture development takes place within regulatory frameworks that recognise the benefits of aquaculture growth and respect other uses and values of our waterways.
- Partner with Māori: Deliver on the Crown’s aquaculture settlement obligations and recognise Māori development objectives.
- Internationally leading: Maintain our position as a global leader in the management of environmentally sustainable aquaculture.

How we will work
- Do what we do well: Align government resources on those activities where government is best suited and most able to add value.
- Enabling and partnering: Work alongside stakeholders in areas of mutual interest to maximise the benefits from sustainable economic growth.
- Results focused: Ensure actions are outcome oriented and delivered in a meaningful timeframe.
- Making informed decisions: Decisions will be based on the best available and credible biological, economic, social and cultural information from a range of sources. Decisions will be risk and intelligence led.

Delivering on the objectives requires a whole-of-government approach. While MPI’s Aquaculture Unit is the principal adviser to the Government on aquaculture, other government agencies and local government have core roles and responsibilities that connect with the aquaculture sector.

These agencies work in three key areas: to ‘regulate’ aquaculture activities, to ‘implement’ regulatory and non-regulatory processes, and to enable sector ‘growth’. Whilst certain agencies lead on certain matters, other agencies contribute to each other’s core responsibilities. This strategy and action plan ensures greater coherence, co-ordination and prioritisation of activities across agencies.
The Government’s Aquaculture Strategy and Five-year Action Plan Map

BY 2025 THE NEW ZEALAND AQUACULTURE SECTOR WILL HAVE SALES OF $1 BILLION PER ANNUM

INDUSTRY STRATEGY

Promote environmental sustainability and integrity of aquaculture
Secure and promote investment in aquaculture
Promote Māori success in aquaculture
Develop the market for New Zealand aquaculture products
Maximise opportunities for innovation
Strengthen the partnership with government and other stakeholders

TOWARDS $1 BILLION – FACILITATING THE GROWTH OF A SUSTAINABLE AQUACULTURE INDUSTRY

</thead>
<tbody>
<tr>
<td>A Healthy Aquatic Environment</td>
<td>Provide risk-based guidance to support ecological impact assessments. <strong>MPI, DOC</strong></td>
<td>2013/14</td>
<td>Core action</td>
<td>RA decisions informed by a national risk assessment of ecological effects</td>
</tr>
<tr>
<td></td>
<td>Establish a national aquaculture working group to review science for important applications and planning initiatives. <strong>MPI, MSI</strong></td>
<td>2013/14</td>
<td>Implementation/business as usual</td>
<td>Councils in relevant regions have developed an integrated approach to aquaculture that maintains healthy aquatic ecosystems by 2016</td>
</tr>
<tr>
<td></td>
<td>Through the implementation of national policy statements, facilitate integrated management to support healthy aquatic ecosystems and maintain water quality in aquaculture growing areas. <strong>DOC, MPI, MFE</strong></td>
<td>2013/14</td>
<td></td>
<td>Water quality in core aquaculture growing areas maintained or improved</td>
</tr>
<tr>
<td></td>
<td>Establish a process to monitor and review environmental performance. <strong>MPI, DOC, MFE</strong></td>
<td>2013/14</td>
<td></td>
<td>Industry biosecurity plans in place by 2014</td>
</tr>
<tr>
<td></td>
<td>Establish biosecurity plans for key growing regions. <strong>MPI</strong></td>
<td>2013/14</td>
<td></td>
<td>New Zealand’s environmental performance as an aquaculture producer assessed as world leading</td>
</tr>
<tr>
<td>Quality Planning &amp; Permitting</td>
<td>Work with regional councils to ensure planning to identify opportunities for aquaculture growth, including through identifying new growing areas in appropriate places and provisions to enable better use of existing space. <strong>MPI</strong></td>
<td>2014/15</td>
<td>Core action</td>
<td>80% of regional coastal plans include aquaculture provisions in accordance with the policies in the NZCPS by 2016</td>
</tr>
<tr>
<td></td>
<td>Partner with industry to develop regional growth scenarios to inform planning and prioritisation. <strong>MPI</strong></td>
<td>2014/15</td>
<td>Implementation/business as usual</td>
<td>4000 ha of new aquaculture space developed by 2016</td>
</tr>
<tr>
<td></td>
<td>Work with district councils to ensure district planning enables aquaculture growth. <strong>MPI, MFE</strong></td>
<td>2014/15</td>
<td></td>
<td>District plans provide for essential infrastructure in key growth regions</td>
</tr>
<tr>
<td></td>
<td>Develop best practice guidance for consent processing, consent conditions, information requirements and changes of use to promote national consistency. <strong>MPI, DOC, MFE</strong></td>
<td>2014/15</td>
<td></td>
<td>95% of consents and UAE tests within statutory timeframes</td>
</tr>
<tr>
<td></td>
<td>Efficiently administer undue adverse effects on fishing test processes (UAE) and other permitting processes. <strong>MPI, EPA</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Establish and administer the ‘Planning Fund’ to assist councils’ plans for aquaculture growth. <strong>MPI</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Collect and improve information on the ecological, cultural and social costs and benefits of aquaculture to support decisions and community comfort. <strong>MPI, DOC, MFE</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Develop options to improve the management of land-based aquaculture. <strong>MPI, DOC</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Complete outstanding components of marine aquaculture reforms transferred to RMA Phase II reforms. <strong>MFE, DOC, MPI</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Establish appropriate governance groups to support implementation of this strategy, such as the ‘Aquaculture Forum’. <strong>MPI</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Effective and Responsive Regulation</td>
<td>Ensure aquaculture is considered in future reviews of relevant legislation and policy governing the sector (e.g. EEZ, biosecurity, animal welfare). <strong>ALL departments</strong></td>
<td>2014/15</td>
<td>Core action</td>
<td>Ministers are advised on options to review land-based aquaculture in 2012</td>
</tr>
<tr>
<td></td>
<td>Review the interface between aquaculture and the QMS framework to enable appropriate enhancement and ranching activities. <strong>MPI</strong></td>
<td>2014/15</td>
<td>Implementation/business as usual</td>
<td>Reviews of relevant legislation and policies are informed by, and recognise the implications for, aquaculture</td>
</tr>
<tr>
<td>Support Māori Objectives¹</td>
<td>Deliver the Crown’s aquaculture settlement obligation. <strong>MPI, DOC</strong></td>
<td>2014/15</td>
<td>Core action</td>
<td>Ministers are advised on future management frameworks for ranching and enhancement activities by 2014</td>
</tr>
<tr>
<td></td>
<td>Assist Māori in developing aquaculture objectives as part of iwi fisheries plans, forum fisheries plans, or other processes. <strong>MPI</strong></td>
<td>2014/15</td>
<td>Implementation/business as usual</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Recognise specific Māori interests across the aquaculture work programme. <strong>MPI</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Provide ongoing support for Māori development in aquaculture. <strong>MPI, TPK, NZTE</strong></td>
<td>2014/15</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Increase Market Revenues</td>
<td>Develop an aquaculture investment plan to support growth. <strong>NZTE, MFAT</strong></td>
<td>2015/16</td>
<td>Core action</td>
<td>Aquaculture settlement achieved within statutory timeframes</td>
</tr>
<tr>
<td></td>
<td>Fund market co-ordination role within Aquaculture New Zealand. <strong>NZTE</strong></td>
<td>2015/16</td>
<td>Implementation/business as usual</td>
<td><strong>Iwi fish plans include Māori aquaculture objectives as appropriate</strong></td>
</tr>
<tr>
<td></td>
<td>Ensure where appropriate that government funding for market support includes aquaculture within scope. <strong>NZTE, MFAT</strong></td>
<td>2015/16</td>
<td></td>
<td><strong>Māori interests are actively considered in aquaculture actions and recorded in advice</strong></td>
</tr>
<tr>
<td></td>
<td>Review and document trade barriers in key markets for seafood products. <strong>MPI, MFAT</strong></td>
<td>2015/16</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Within trade negotiations, work to improve trade conditions for seafood products. <strong>MFAT, MPI</strong></td>
<td>2015/16</td>
<td></td>
